

# EARN

WHITEPAPER

OUR  
**PRINCIPLES**

# WHERE **DEFI** AND **NFT** **MEET.**

# WHAT IS EARNX?

EarnX is a unique utility token developed to support Non-Fungible Token (NFT) through the Yearn Classic Finance platform ecosystem.

EarnX is one of the first to merge NFT and DeFi.

With EarnX, you will be able to purchase both a physical product and its unique NFT via EarnX NFT market place. An RFID chip is implemented inside the physical product and it will give you access to the unique NFT linked with these physical products.

These auctions will be available to EarnX holders and the community will vote for the products they want to put next into the marketplace.

FRICITIONLESS TOKEN

DEFLATIONARY

**BUILT ON BSC NETWORK  
(BEP-20)**

You are safe against any rug pull. Token ownership is renounced and liquidity is locked with DxSale.

You benefit as supply is limited and constantly burning, which makes it scarce, hence price stability is guaranteed.

Every transaction attracts a 10% tax. Half of it gets redistributed proportionately among holders and the other half adds to the EarnX Liquidity Pool. So you can just HODL and earn!

You benefit from a constantly increasing token value, based on redistribution channels and automatic LP contribution by each trade.

You benefit from low gas fees and highest scalability, as EarnX is built on the BSC network

At anytime, you can utilize your tokens against our unique and physical collectibles, providing utility to EarnX.

# TOKENOMICS

EarnX has a 10% tax on all transactions to prevent price manipulation and encourage holding. The 10% tax is splitted into two:

## LIQUIDITY

50% (5% of the transaction) is locked in the liquidity pool for 4 years.

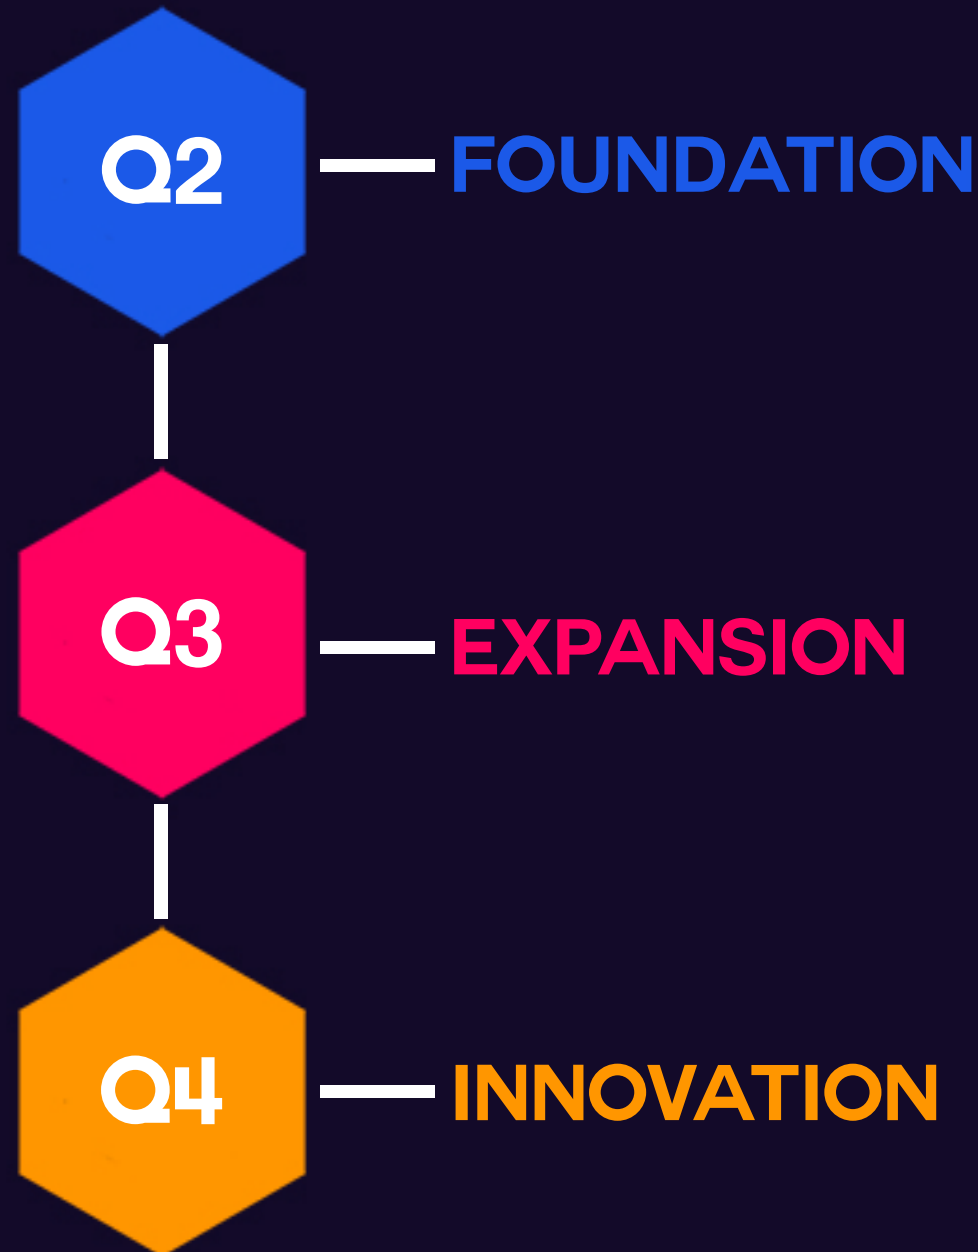

## HOLDERS

50% (5% of the transaction) goes as a weighed distribution to all holders and the burn address. This means holders can benefit from the auto staking rewards by simply holding the tokens in TrustWallet / MetaMask or by leaving them on exchange to participate in NFTs exclusive whitelist if rewards are not your interest.

57% of coins were burnt on launch. At the moment, the burn address holds 64.7% of the coins and it is increasing. This burnt adress can't be accessed, and therefore it is impossible to sell these coins. 5% of the fee going to holders will be distributed proportionately to the size of wallets, this includes the burnt wallet. Hence, more and more tokens are getting burnt on every transaction (3.2% of every transaction at the moment).

# 2021 ROADMAP

- ✓ Launch of EarnX trading
- ✓ Listing on information centers (CoinMarketCap, CoinGecko)
- ✓ Build a solid community of EarnXers
- ✓ Launch first marketing campaign
- ✓ Launch trading on tier 2 and tier 3 exchanges
- ✓ EarnX audited and vetted by a credibility agency
- ✓ Produce and deliver the first BNB collection Rugs

- ⚙ Develop partnerships and affiliations
- ⚙ Populate the NFT space
- ⚙ Recruit new team members and bring more utility to EarnX

- ⚙ Trading on major exchanges
- ⚙ Revolutionize the NFT world with research and innovation
- ⚙ Launch our own NFT auction platform with a crypto gateway

# PRODUCTS

The first product to benefit from EarnX ecosystem is persian rugs.

21 Rugs will be produced by the team.

## COLLECTIONS

 BNB

 DOGE

 BTC (Handmade) x5 collection
