Introducing EarnX

Built on the Binance Smart Chain platform, EarnX is a deflationary, frictionless token introduced to revolutionize NFTs in the cryptocurrency industry, by aiming to rapidly gain momentum via crowd funding. EarnX is a product formed on the principles of being Rare, Stability, Deflationary and with Utility.

The evolution of NFTs has taken over the technological advancement of purchasing and selling unique assets virtually. With technology, currency and security coming together, the cryptocurrency industry has modernized using diverse cryptocurrencies to overcome the traditional method of import and export of goods and services.

Being one of the early adopters within the NFT industry, EarnX presents a unique opportunity for individuals to profit from the one of a kind utility token.

With a merger between DeFi and NFTs, EarnX provides a majority of features that will help overcome the sale of goods and services in an efficient and timely manner without disruption from external factors.

EarnX's first innovative project is that of NFT tagged RFID chipped Persian rugs, which are currently in manufacturing. With the current situation around the world, EarnX provides the possibility to browse and purchase the unique collection of rugs it has to offer virtually using the blockchain via its EarnX tokens. The tokens are hosted on Binance's user-friendly BSC platform that use smart contracts. The platform was selected over others due to its ability of scalability, transparency and efficiency.

The main concept behind the launch of EarnX is to ease the buy and sell of utility goods and services virtually and effectively, relying on the technological tools at hand.

What is EarnX

EarnX is a unique utility token developed for the platform of NFTs. The token's main goal is to create a marketplace to trade NFTs efficiently by providing its products both virtually & physically. EarnX tokens are being hosted on the BSC platform, thus is smart contract based.

EarnX Features

Scalability

Built on the BSC network,
EarnX is highly scalable
with a low gas fee

Safety

Safe against rug pulls
Token ownership renounced
Liquidity secured with DxSale

Stability

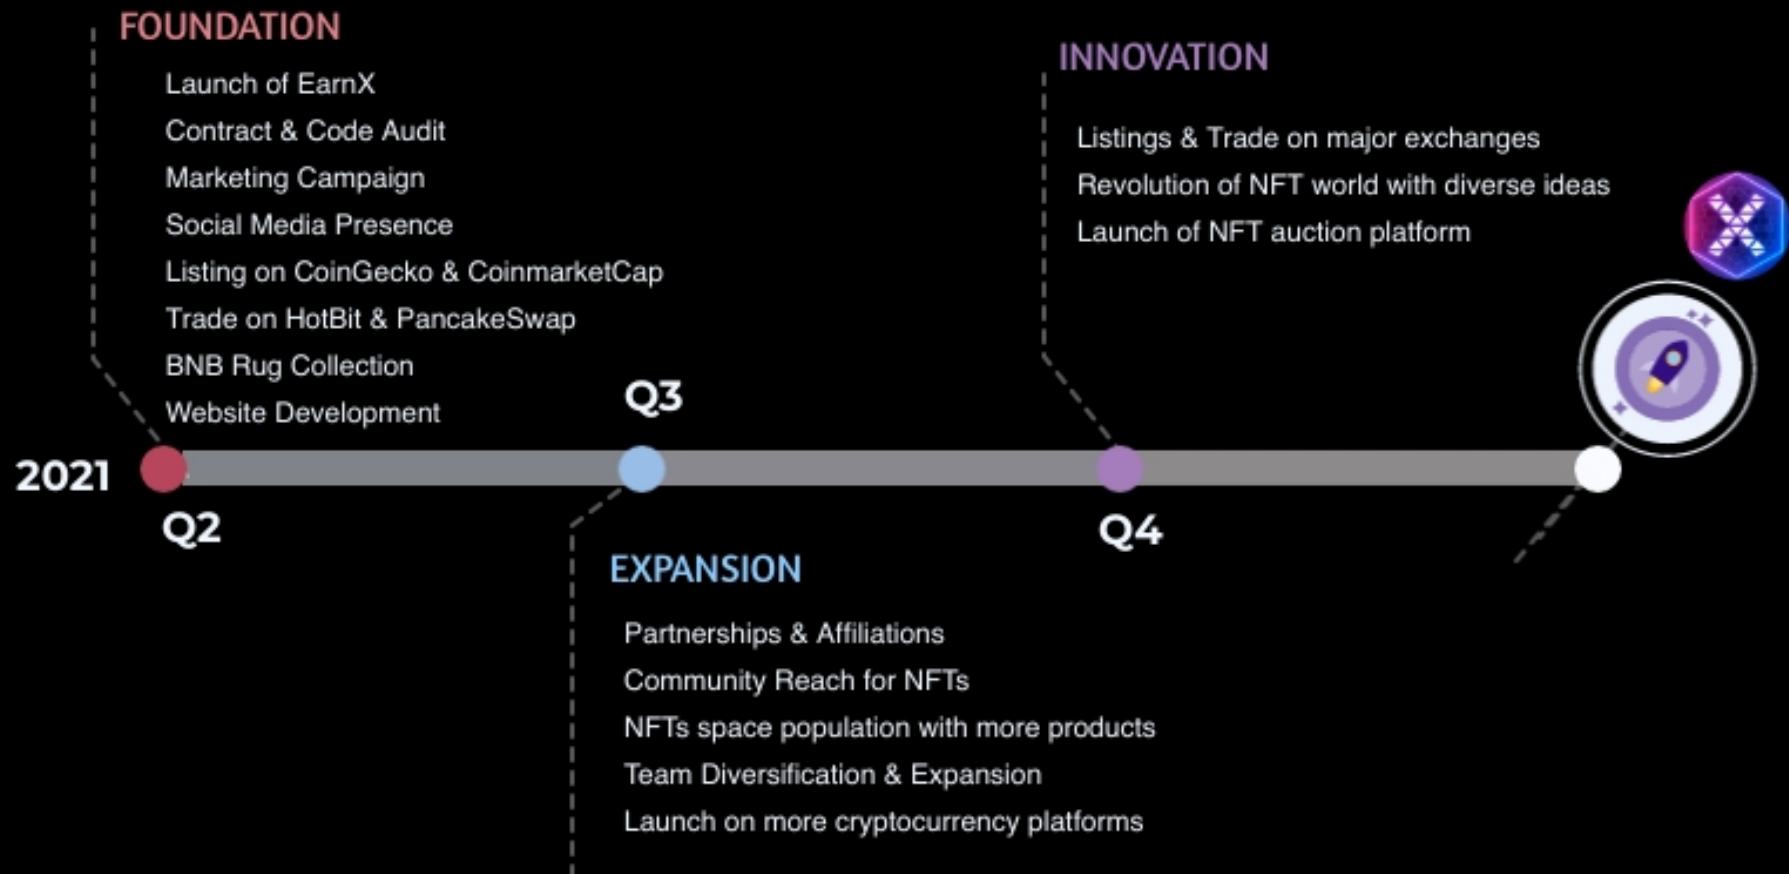

Stable as supply is limited and
constantly burning resulting in
scarcity and stability

Utility

Utilize the EarnX tokens
against the unique virtual and
physical collectibles

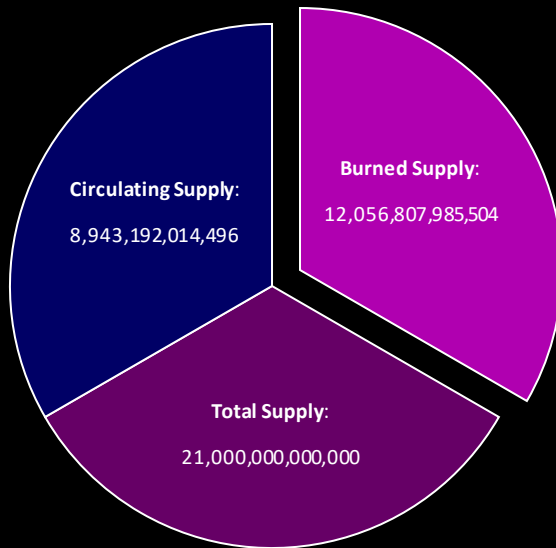

EarnX Roadmap

EarnX Tokenomics

Name: EarnX \$Earn

Token Blockchain: BSC20

The current statistics of EarnX as follows:

- 6800+ Holders of EarnX
- \$17.25 Million Market Cap
- \$13.35 Trillion EarnX Burned
- 95% liquidity locked until 2025

EarnX Distributions

EarnX's Distributions follows the chart, where:

10% is the transaction fee

5% goes into liquidity

5% goes to the holders for every transaction, which means holders can benefit from the auto staking rewards by simply holding the tokens in Trust Wallet/MetaMask or by leaving them on exchange to participate in NFTs exclusive whitelist if rewards are not your interest

EarnX Contract

Developed on the Binance Smart Chain platform, EarnX is a smart contract- based token. The contract's source, read and write code have been successfully verified by BSC and the ownership to the contract has been renounced.

Merchandise

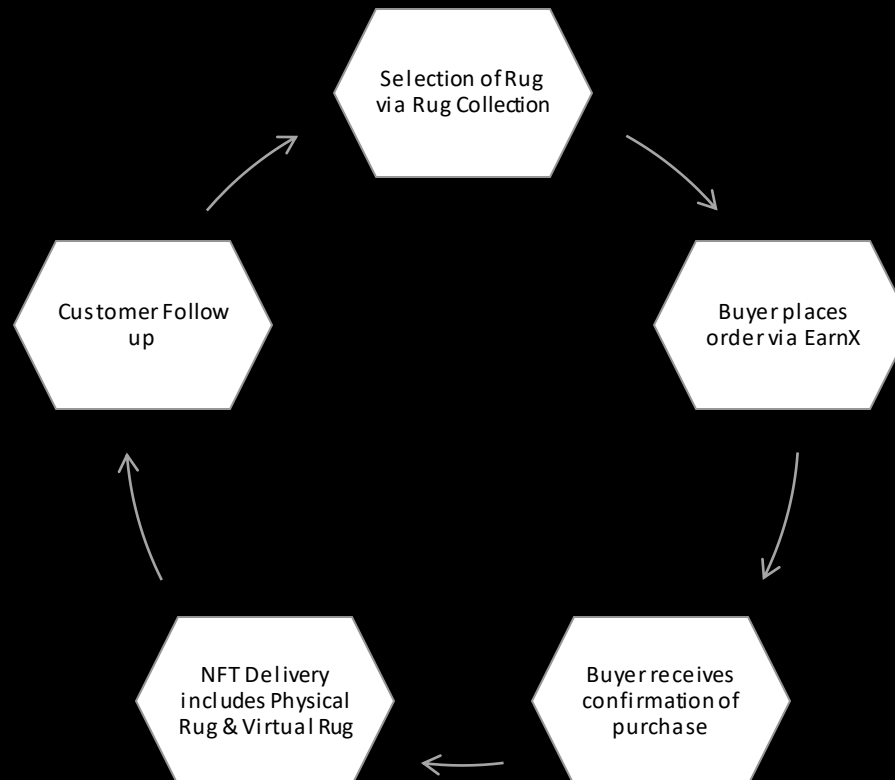

EarnX- RFID Persian Rugs

EarnX's first NFT is the RFID tagged Persian Rugs. The rugs will be delivered both physically and virtually to the buyer to ensure uniqueness of the NFT has been achieved.

The Persian Rugs Work Cycle

Rugs - Binance Collection Samples

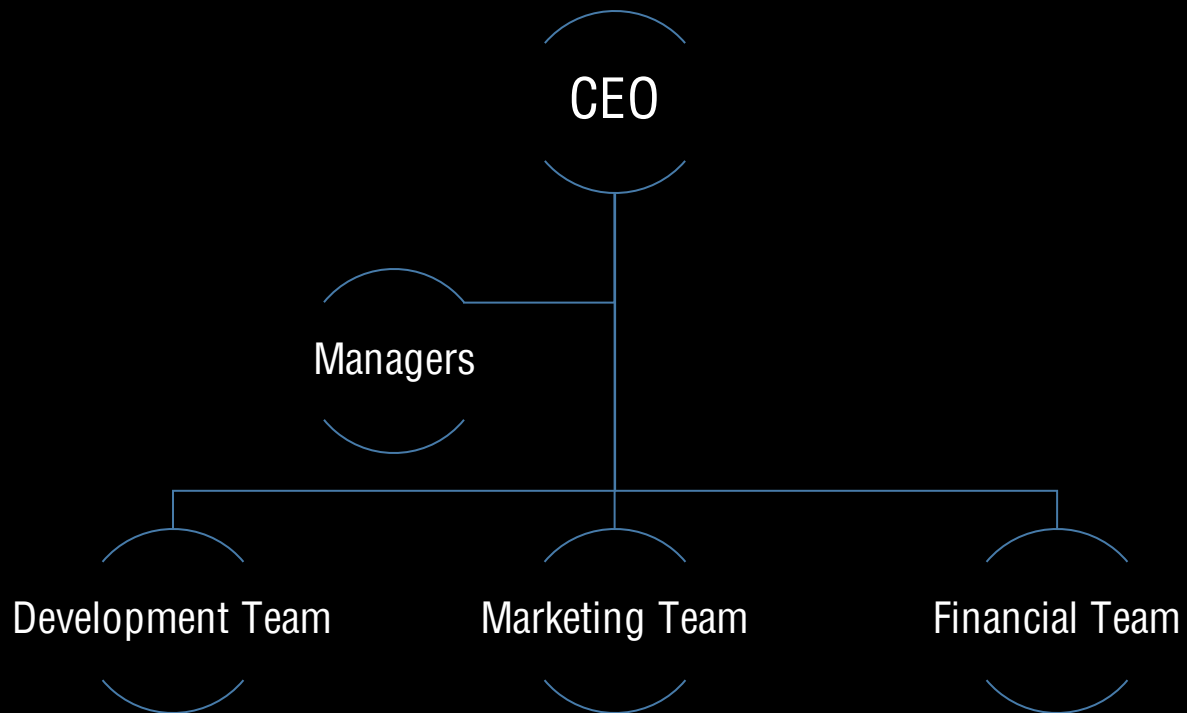

Rugs - Persian Collection Samples

Our Team is due for expansion over the next few months, consisting of diverse individuals working together to expand EarnX

The Future

EarnX will continue to enhance its processes and ideas as it expands into the era of technological revolution of NFTs. The NFTs business is booming and being the early adopters, we have the advantage of exceling in the domain. EarnX is a unique token as it allows both virtual and physical rugs to be distributed to the buyer, making it quite rare. EarnX hopes to launch more products in the near future and make an entry to the NFT Auction marketplace.
